EDUCATION

University of Massachusetts - Amherst, MA

Bachelor of Science in Computer Science

GPA: 3.5

Expected May 2025

COURSEWORK

Software Engineering, Data Structures, Algorithms, Programming Methodology, Object Oriented Programming, Web Development, Cloud Computing, Operating Systems, Computer Systems Principles, Statistics and Reasoning

PROJECTS

<https://mehtapvt010.github.io/Portfolio/>

FitTrack Lite – Fitness Tracking + Macro Sync Platform

April 2025

<https://github.com/mehtapvt010/fittrack-lite>

- Developed a full-stack fitness tracker with secure JWT auth, real-time workout logging, and nutrition syncing; cut dashboard latency 70% using Redis caching and Upstash streams.
- Engineered S3 CSV ingestion + Lambda parser for meal data, CloudWatch alerts, and volume goal tracking logic; enabled personalized macros insights with AWS event-driven automation.
- Built polished, mobile-ready UI with dark mode, streak badges, volume graphs, and weekly adherence reports; deployed via Vercel/Render with CI/CD and live alerts via SES.

Embedly Connect – SDK + Embeddable Feedback Widget

April 2025

<https://github.com/mehtapvt010/embedly-connect>

- Built a plug-and-play web SDK and embeddable widget installable via CDN/NPM in <2 mins, streamlining client integration and reducing manual setup by 80%.
- Architected APIs with secure auth and admin dashboard boosting real-time feedback visibility and operational response speed.
- Deployed with CLI support, usage docs, and CI pipeline; powered live analytics, tripling feedback quality insights.

Flappy Bird Game with AI Player Improvement

September 2024

<https://github.com/mehtapvt010/Flappy-Bird-with-AI-Player>

- Engineered a Flappy Bird game clone from the ground up using Pygame, optimizing game mechanics and UI for fluid gameplay and achieving consistent 60 FPS performance.
- Developed an adaptive AI using Python's NEAT library, driving the system to autonomously play the game and evolve its strategies over multiple generations, improving gameplay success rate by over 80%
- Streamlined performance tracking and AI adjustments, improving learning efficiency and speeding up generation cycles by 25%.

EXPERIENCE

Computer Lab Assistant | *Berkshire Community College*

January 2022 – May 2023

- Assisted students, faculty, and staff with computer, software, and peripheral issues, and provided guidance on lab equipment and educational software
- Monitored and reported equipment issues to IT for 40+ distinct devices.
- Performed routine maintenance, including updates and virus scans

SKILLS

Languages: Java, Python, C/C++, SQL (Postgres), JavaScript, TypeScript, HTML/CSS

Frameworks: React, Node.js, Flask, JUnit, WordPress, Material-UI, FastAPI

Developer Tools: Git, Docker, Redis, TravisCI, AWS, PyCharm, Eclipse, Tailwind, Express, MongoDB

Soft Skills: Analytical, communicative, collaborative, adaptable, accountable, detail-oriented, proactive, growth-minded.

AWARDS

Dean's List - Fall 2024 (University of Massachusetts, Amherst)

Richard and Susan Cetti Scholarship for Excellence in STEM 2022 (Berkshire Community College)

Gary Lamoureaux Scholarship 2022 (Berkshire Community College)
